LINK NUMBER ASSIGNMENTS

Today Steve Crocker asked me to announce that from now on link numbers 2-71 (decimal), inclusive, are to be valid for use in connections. Accordingly, the Host-Host Protocol Document, which I am currently writing, will contain the following "declarative specification".

Links are assigned as follows:

| Link Number | Assignment |
|-------------|--|
| 0 | Control link |
| 2-71 | Available for connections |
| 1, 72-190 | Reserved-not for current use |
| 191 | To be used only for measurement work under the direction of the Network Measurement Center at UCLA |
| 192-255 | Available for private experimental use |
